

# Rebate and Incentive Services

## Maximize your return on investment with comprehensive rebate administration services for energy efficiency projects.

Make the most of your time and capital by capturing rebates and incentives available from utilities and other third-parties for your energy efficiency projects – including new construction or equipment replacement and retrofit projects. From start to finish, we can take over the complex rebate filing and management process so you can focus on other business objectives.

We will review your project scope and site list to determine which sites are eligible for the best rebates and should be prioritized. We'll help you optimize your schedule around completing projects quickly, making sure you don't miss any deadlines. This optimization process will provide rebate revenue which can be reinvested back into your budget, fund more projects, and achieve more savings.

### Let us help you with:

- Early-stage budget consulting
- Project scheduling and implementation guidance
- Comprehensive end-to-end application management
- Pre-approval confirmations
- Utility site-inspection coordination
- Custom rebate and incentive negotiations
- Payment expediting

Collectively, our team has secured more than 250,000 rebate checks in support of our customers' new construction projects, renovation projects, and retrofit programs. Contact us today to learn how we can help your business leverage our services and maximize success.
